

The ABS Difference:

- Chlorine dioxide germicide swiftly kills all mastitis causing organisms including Staph, Strep, Mycoplasma, molds and yeasts.
- LAS, a secondary germicide, ensures teats are protected right up to the next milking.
- Effective combination of emollients formulated to maintain healthy skin year-round.
- Bright color marking readily identifies dipped teats.

Valiant

Valiant Barrier—The Ultimate Level of Protection

- Penetrates teat canal and clings to teats forming a barrier film on teat skin to physically block pathogens

Valiant Pre—The Milker's Best Friend

- Designed to thoroughly clean teats and kill mastitis causing organisms quickly and efficiently before milking
- Quick 15 second kill

Valiant Pre-Post—The Healthy Teat Specialist

- Dual germicide with lactic acid to promote teat exfoliation
- Special teat conditioning formula rejuvenates dry teats and keeps them in top condition

Available in 5-, 15- and 55-gallon containers.

ENCORE

Encore Pre-Post—The Teat Conditioning Expert

- Special teat conditioning formula for healthy teats in all weather conditions
- One product for pre and post dipping

Encore Barrier

- More barrier on teats, 17% less waste with no barrier build up
- Effective physical barrier that bacteria cannot penetrate

Available in 15- and 55-gallon containers.

Express

Express for Predipping

- Designed to thoroughly clean teats before milking
